"Clinical Data Management"

- Felix Froemel (felix.froemel@charite.de)
- The-Hoang Do (hoang.do@charite.de)

KKS Charité
Augustenburger Platz 1
13353 Berlin

General information

- Completely web-based software (using standard browser without any installations)
- Charité firewall
- 128-bit SSL encrypted connection with the Charité server
- Individual user accounts can be provided quickly (access application form templates will be send)

Software functions

- It is desired that every form should be completed before saving the data
- Programmed rules for increased data quality (hard and soft rules)
- Detailed error messages help to identify the source of entry errors
- Document upload possible, e.g. ICA form
Remember to anonymise all forms before uploading

Software functions

Help!

- eCRF symbols explained under 'Help' at the visit schedule page
- Specific help texts if needed (e.g. NYHA classification and references to external homepages)

eCRF handling and care

- User should only use the menu provided by the software

Not using the browser's navigation like "Back", "Forward" or "F5"

- Communication of site requirements and bugs to the KKS data management is highly important (e.g. insufficient field lengths, missing categories)

Every eCRF page provides you contact information
